Pest Control

Are the creepy-crawly critters invading your home? With a few exceptions, most insects enter the home from the outside. This is why Advantage Pest Services focuses the brunt of their attack on pests at ground zero - the perimeter of your home - by establishing an approximately ten-foot protection zone of residual material to stop those nasty bugs from entering. We use products that are low in odor and mammalian toxicity. David and the Advantage staff know what they're doing and always have a few tricks up their sleeves to tweak those problem pest areas. At Advantage, we know where those pests hide and will do our utmost to provide quality service at a fair price and in a timely fashion.

We also can brush down removable spider webs from the eaves, overhangs and garage area of your home. Inside service is optional and can be incorporated into your customized service plan to provide you with a comfortable level of protection needed by you and your family.

Contact Advantage Pest Services today and let us perform a no-obligation, complementary pest and termite evaluation for you. We offer yearly, quarterly and monthly pest programs designed to stop the bugs that are bugging you. One-time services are also available. Let us show you how you can protect the most significant investments you have - your home and your family's peace of mind.

Don't let a pest problem ruin your day. Let Advantage Pest keep the bugs away!
